M7, Non El Blasting Cap	LOT NUMBER	Qty (Ea)
Other Explosive	LOT NUMBER	Qty (Ea)
Other Explosive	LOT NUMBER	Qty (Ea)
Other Explosive	LOT NUMBER	Qty (Ea)

NARRATIVE

191548CAUG08-Team responded to suspect IED call received from FOB Delta, KBR Security. Item was reported as "vibrating box" at FOB Delta, Post office. Team arrived on site at 1550C and discovered package had been moved outside of post office into nearby bunker. Mr.X from KBR Security was present and said package was "ticking" not vibrating. Incident site had no security perimeter established and no evacuation procedures had been initiated. EOD TL made recommendations to KBR security and continued response preparations. At 1548C EOD confirmed evacuation and deployed Talon robot. Talon robot placed MWB and fired shot at 1550C. After successful shot team verified through Talon camera that no explosive hazards existed. Upon further investigation on site EOD TL discovered silicone vagina replicant AKA "pocket pussy" with vibrating attachment. EOD TL believes this item to be the source of package vibration. EOD TL Cleared site at 191552CAUG08.
